Summary

Motivated and adaptable web developer with hands-on experience in both frontend and backend technologies. Proficient in utilizing React JS, Redux, React Router, React Query, Tailwind CSS, and styled-components for frontend development, creating dynamic and user-friendly interfaces. Backend technologies including PHP Laravel, MongoDB, Express.js, and Prisma contributing to the development of robust backend systems. Demonstrated ability to collaborate effectively within cross-functional teams to meet project requirements and deadlines. Proven track record of learning and applying new technologies, evidenced by involvement in various projects. Dedicated to continuous growth and development in the field of web development.

Education

2006 - 2009

West Yangon University

Bachelor Degree of Art (Philosophy)

Languages

English : Pre-Inter & Inter

Myanmar: Native

Job Experience

2021 - Present

yathar Food Ordering System

Web Developer

- Utilized React JS, Redux, React Router, React Query, Tailwind CSS, and styled-components for frontend development, contributing to the creation of dynamic and user-friendly interfaces.
- Assisted in the development of backend systems using PHP, Laravel, MongoDB, Express.js, Prisma, and Supabase, gaining hands-on experience in backend technologies.
- Designed and implemented robust authentication and authorization systems, bolstering security measures and user access control.
- Participated in the development of multiple projects, collaborating with cross-functional teams to meet project requirements and deadlines.
- Contributed to the implementation of the "Calculate EIR" (Effective Interest Rate) function, learning and applying mathematical algorithms and data processing techniques.
- Gained proficiency in version control using Git, assisting in code management and collaboration within the development team.
- Led the maintenance and updates of the company's in-house website, ensuring its functionality, performance, and security.
- Implemented bug fixes and enhancements to improve user experience and resolve issues promptly.
- Managed and maintained the company's CRM (Customer Relationship Management) system, optimizing workflows and improving efficiency in customer interactions.
- Experienced in working on the StarFM Radio project, employing Laravel and JavaScript for both frontend and backend development by me (<https://starfmradio.live/>)
- Additionally, contributed to frontend development and backend API work for the Yathar food ordering system. Demonstrated ability to collaborate effectively within cross-functional teams, including cooperation with Japanese teams, to meet project requirements and deadlines. (<https://yathar.com/>)

Experience

2019 - 2021

Nexidea (Japan Outsource & Local) YGN

Web Developer

- Collaborated closely with a Japan-based development team to design, develop, and deploy web projects using Laravel.
- Led the development and deployment of web projects, utilizing ReactJs, PHP, Laravel, Javascript, jQuery.
- Utilized Laravel framework to create robust and scalable web applications tailored for the Japanese market.
- Developed backend APIs to support frontend functionalities and ensure smooth data exchange between the server and client applications.

2018 - 2019

New Worth (Yuzana Tower)

Senior Web Developer

- Led the development and deployment of web projects, utilizing PHP, Laravel, HTML, CSS, and jQuery.
- Collaborated closely with cross-functional teams to ensure alignment with business goals and project requirements.
- Participated in client meetings to discuss project specifications, gather feedback, and provide updates on project progress.
- Developed and maintained HR attendance sites and POS systems, ensuring high performance and reliability.
- Played a key role in server development, configuring and optimizing servers for web applications.

20015 - 2017

Self-Employed

Web Developer

- Managed end-to-end website development projects independently, from client acquisition to deployment.
- Utilized PHP, Drupal, HTML, CSS, and jQuery to create responsive and visually appealing websites, both frontend and backend.
- Actively searched for clients, engaged in negotiations, and developed tailored solutions to meet their specific needs.
- Implemented effective project management strategies to ensure timely delivery and client satisfaction.
- Handled all aspects of website deployment, including server setup and configuration, to ensure seamless transition from development to production environment.

20012 - 2015

Creative Web Studio (MICT Park)

Web Developer

- Developed and maintained websites using PHP, Drupal, HTML, CSS, and JavaScript, ensuring high functionality and user experience.
- Leveraged jQuery to enhance interactivity and user engagement on web platforms.
- Collaborated closely with cross-functional teams to ensure seamless integration of web development projects with other company initiatives.
- Engaged in client discussions to understand project requirements, provide updates, and gather feedback, ensuring client satisfaction throughout the development process.
- Contributed to team discussions and brainstorming sessions to optimize workflows, improve efficiency, and implement best practices in web development.

COVER LETTER

Dear Hiring Manager

I am writing to express my interest in the Web Developer position at **Sea**, as advertised. With my solid foundation in both frontend and backend web development, combined with my experience collaborating with cross-functional teams, I am confident in my ability to contribute effectively to your team.

I gained hands-on experience in a wide range of frontend and backend technologies. I am proficient in utilizing React JS, Redux, React Router, React Query, Tailwind CSS, styled-components for frontend development, and PHP Laravel, MongoDB, Express.js and Prisma for backend development. Additionally, I have contributed to the development of both frontend interfaces and backend APIs for various projects. One of my significant achievements includes leading the development of multiple projects, from conception to deployment, utilizing a combination of frontend and backend technologies.

Moreover, I have experience cooperating with teams, having successfully collaborated on projects with stakeholders. This experience has honed my communication skills and cultural sensitivity, enabling me to effectively bridge language and cultural barriers in a professional setting.

I am enthusiastic about the opportunity to bring my skills and experience to **Sea** and contribute to the development of innovative web solutions. I am eager to leverage my technical expertise and collaborative approach to drive project success and achieve shared goals.

Thank you for considering my application. I look forward to the opportunity to discuss how my background, skills, and passion for web development can contribute to the continued success of your team.

Warm regards,
Web Developer

Thura
